## Subcommittee 0 – General Requirements

### SCOPE

B65 SC0 develops the safety specification for the design and construction of new equipment used in prepress systems, printing press systems, binding and finishing systems, converting systems and stand-alone platen presses. This includes equipment used in stand-alone mode or in combination with other machines, including ancillary equipment, in which all the machine actuators (e.g. drives) of the equipment are controlled by the same control system.

**Chair:** Vacant
