CGATS SEEKS DIGITAL PRESS MANUFACTURERS

CGATS SC6/TF2, the task force of the Committee for Graphic Arts Technologies Standards (CGATS) that developed the PPML/VDX standard for variable printing data exchange, is working on identifying reference color characterization data sets for color digital presses. These data sets need to be based upon color gamuts achievable by a reasonable number of digital presses. The task force is seeking all color digital press manufacturers who have devices with rated speed greater than 45 pages-per-minute to participate in the development of these characterization data sets.

A conference call will be scheduled in to discuss the next steps for developing the color characterization. Please contact Mary Abbott at mabbott@npes.org or 703/264-7200 if you are interested in participating or wish further information. Visit <http://www.npes.org/standards/cgats.html> for more information on CGATS.
